

PRESS RELEASE

19th February 2026

This statement is to address recent concerns regarding a temporary shortage of LP gas cylinders in the market, and to assure the public that sufficient stocks have been secured and that there is no need for panic buying.

The temporary supply constraint was caused by an unexpected surge in market demand for Litro Gas, combined with two days' gas supply interruption on 14th February 2026. Accordingly, we have taken immediate measures to restore normal distribution as below.

1. We have already issued 284,000 no's of domestic refill cylinders on 17th and 18th of February 2026.
2. Further 351,000 no's of domestic refill cylinders will be issued from today to Saturday.

The company has already placed orders for adequate stocks as needed, with three shipments scheduled to arrive before the end of this month to further stabilize supply.

Therefore, there will not be any shortage of gas in the future.
